I am very impressed with Brian's ability to turn on a dime. Having worked with many software integration consultants and after being one in a past life, I think Brian is one of the best! From delivering well-documented specifications to making last minute feature changes, he never missed a beat.

Brian is capable of thinking strategically, inspiring others to execute his vision, while being able to execute the vision himself. I have found it rare among people in the software industry who can both be visionary as well as possess the skills to execute.
